

## ISO 9001 INTERNAL AUDITOR TRAINING

ISO 9001 Internal Auditor training provides participants with an understanding of auditing quality management systems.

### **This course is ideal for:**

- Individuals who want to become internal auditors for their company under ISO 9001:2008
- Current auditors who are not performing up to expectations
- Companies desiring more return on your investment from their quality system
- Companies requiring additional personnel trained in ISO auditing techniques

Instructor Donald A. Olszewski, NEPIRC's Director of Quality and Industry Certification, is a Registrar Accreditation Board (RAB) ISO 9000 Certified Auditor and has successfully completed ISO 14000 Lead Auditor training course.

### **Prerequisites:**

Familiarity with the ISO 9001:2000 standard is suggested but not necessary. If you already are an auditor, your knowledge of the audit process will be expanded.

### **Course Outline**

This is an interactive workshop blending classroom instruction and simulated audit processes.

Participants will learn the proper conduct and roles of an auditor, the content and structure of a documented quality system and how to conduct an internal audit using effective interview skills.

### **Outcomes**

Participants will learn to:

- Plan and prepare for an internal audit
- Estimate time and resource requirements
- Develop and use checklists
- Implement the ISO 9001:2008 Quality Management System Standard
